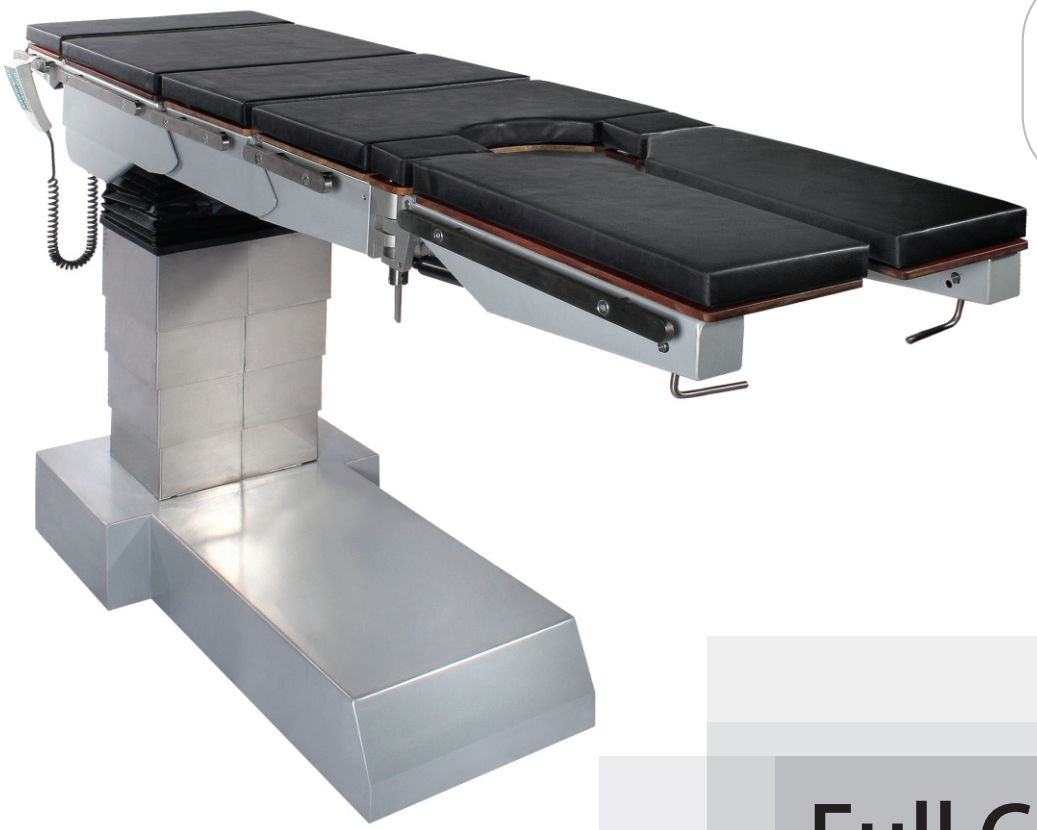
Operating Imaging Tables



C-ARM 502

Full C-ARM Access

C-ARM 502

The new generation of operating tables for maximum **C-ARM** access is designed to offer maximum flexibility for patient positioning required for modern surgeries. Frame, column and base cover and accessory rails are made of stainless steel, washable and easy to clean.
High technology electrohydraulic system ensures the high degree of functionality and safety.
Table Top is completely radiolucent with finest antistatic mattress. The table features four castors and an electrohydraulic brake system operated by lock/unlock key on the hand control. **C-ARM 502** is a battery-operated operating table which can also be connected to the mains. The battery can even be used while is charging. Lightweight, user friendly and full option hand control with spiral cable permits quick and easy patient positioning.
